

# || CALIBRE

CALIBRE male medical enhancement is a painless 1-hour, in-clinic procedure designed to increase penis girth.

Results are immediate, long lasting and reversible

## Who Is Suitable For CALIBRE?

CALIBRE is suitable for most men who wish to increase their current penis girth. Our patients are of all ages, background and personal circumstances. CALIBRE is suitable for both circumcised and uncircumcised men.

You must be over 18 years, have realistic expectations of potential results and not suffering any serious medical conditions. CALIBRE may assist but is not designed to resolve bends.

## The CALIBRE Procedure

We use TGA-approved cosmetic fillers (hyaluronic acid) using a special injection technique. The product acts as a volumizer in the penis just like it does on the face. Product is injected just below the surface of the skin and is naturally integrated into penile tissue after 2 weeks. Up until then, the product can be gently massaged to smooth out any bumps and ensure even coverage. It takes a couple weeks for the dermal filler to stabilize, absorb water and look its best, after which it is slowly metabolized and resorbed by the body over time (approximately 2 years).

## What Results Can I Expect?

- Your augmentation will depend on your natural penis size and the total volume of filler injected. 1ml product = 1 ml augmentation.
- Maximum volume in a session is generally 15mls, which produces a noticeably larger size.
- You may have progressive top-ups until your desired results are achieved, however, your Doctor will aim to optimize size and symmetry based upon your unique circumstances.
- Most men aim for a 1-inch increase in the flaccid circumference of the shaft of the penis, which equates to approximately 0.5-0.7 inch erect.
- With larger volumes (10ml+) the extra weight tends to increase flaccid length too.
- You will notice less "shrinkage" when cold or embarrassed and increase is obvious to partners.
- Results will vary between patients.

## How Long Will The Results Last?

We expect CALIBRE to resorb over 2 years (or longer), but may require small top ups to maintain desired size. Fortunately, HAs are completely and rapidly dissolved so any problems (which are minor and uncommon) are reversible. The longevity can also depend on factors such as your natural metabolism and exercise. Repeat sessions tend to last longer.

## Confidential Consultation and Program

A preliminary Doctor consultation is required at least 1 week prior to treatment to ensure all your questions have been answered, risks explained and likely outcomes discussed. It is important your perception of size is discussed and you have realistic expectations of what CALIBRE penis augmentation can do for you. We encourage you to raise any questions or concerns so these can be resolved prior to treatment.

Most treatment programs are scheduled over 1-3 sessions a couple weeks apart, depending on the total volume and your unique circumstances. You may fly in for treatment.

## How Much Does CALIBRE Cost?

The standard pricing for CALIBRE penis augmentation is based on the volume of dermal filler required:

Packages:

Glans Only (3mls):	\$1,950
Silver Package (7mls):	\$4,200
Gold Package (10mls):	\$5,700
Platinum Package (15mls):	\$8,100

Prices for larger packages can also be quoted during your consultation or on the day of treatment.

Progressive sessions are available every month to increase augmentation. Further treatments within 4 months of first session will only be charged the incremental fee to the applicable higher package. Treatments beyond 4 months of the first session will be entitled to 10% discount on published rates.
